

Lanadol ABAC

Disinfectant for outerwear, nursing home ware, protective clothing, and gas masks. For disinfection of the rinsing zone in tunnel washers.

Lanadol ABAC TM D 20/12

Characteristics

- LANADOL ABAC is suited for disinfecting delicate textiles that cannot be treated with conventional disinfection procedures.
- LANADOL ABAC can be used for disinfection if rinsing zone and press of tunnel washers.
- LANADOL ABAC has a broad microbicidal spectrum of activity against Gram-positive and Gram-negative bacteria, yeasts, and fungi.
- LANADOL ABAC has good wetting properties, is resistant to hard water and gives textiles antistatic properties as well as a slight retexturing effect.
- LANADOL ABAC can also be used in combination with LANADOL APRET.
- LANADOL ABAC is also suited for washing procedures with other Kreussler gentle and colour wash processes.
- Textiles that have been disinfected with LANADOL ABAC showed good skin compatibility in the epicutaneous test (Dermatological certificate).

Chemical-physical data

Appearance	Light yellow, clear liquid
Density	0.94 g/ml
Viscosity	120-220 mPas
pH-value	6-7,5 (5 g/l (0.7 oz/gal) (approx pH=7)
Solubility	Unlimited in water
Flash point	> 100°C (212 °F)

Certificate

Yeasticidal properties according to DIN EN 1650; application: dosage 0,4 ml/l (0.32 ozfl/gal) at an exposure time of 5 min. and a temperature of 20 °C (68 °F)

Bactericide properties according to DIN EN 1276; application: dosage 0,4 ml/l (0.32 ozfl/gal) at an exposure time of 5 min. and a temperature of 20 °C (68 °F)

Virucide properties according to DIN EN 14476 Murines norovirus (MNV); application: dosage 1 ml/l (0.128 ozfl/gal) at an exposure time of 5 min. and a temperature of 30 °C (86 °F)

Use biocides safely. Always read the label and product information before use.

Application

For washable textiles 20 – 40 °C (68-104 °F)

Recommended concentration: 0,4 – 1 ml LANADOL ABAC per litre (0.51 ozfl/gal) of liquor.

Storage and dispatch

In closed containers, OTTALIN SOFT has a minimum shelf life of 24 months.

After exposure to frost, allow LANADOL ABAC to warm up to temperature of approx. 15 °C (59° F) before use.

Expiration date: 24 months after date of manufacture.

Standard packagings	Dispatch unit / pallet
4 kg Plastic Canister	80
22 kg Plastic Canister	36
190 kg Plastic Drum	2
